TABLEAU DASHBOARD PROJECT

HappyPaws Store Sales Performance Analysis Dashboard using Tableau

Student Name	Anurag Yadav
Roll No.	T051
Class / Batch	T.Y BSc - IT
Subject	Data Visualization with Power BI and Tableau
Academic Year	2026-2027

Submitted to: Prof. Mr.SumitKumar Tripathi

1. Project Title

HappyPaws Store Sales Performance Analysis Dashboard using Tableau

2. Objective

The main objective of this project is to create an interactive dashboard using Tableau for analyzing the sales performance of HappyPaws Store. The dashboard converts raw sales data into meaningful visual information and helps users understand sales, profit, quantity, category-wise performance, animal-type performance, regional performance, product performance, and time-based trends.

3. Project Description

This project uses Tableau to develop an interactive HappyPaws Store Sales Performance Dashboard. The dashboard contains key performance indicators (KPIs), charts, filters, and visualizations that allow users to explore the dataset. Users can analyze sales and profit based on different categories, animal types, regions, states, products, and time periods. The project demonstrates how data visualization can be used to identify patterns and communicate pet-store business information clearly.

4. Dataset Details

Parameter	Details
Dataset Name	HappyPaws Store Sales Dataset
Source	Self-created / Synthetic Sales Dataset
Number of Records	1,000
Important Fields	Sales, Profit, Quantity, Category, Animal Type, Region, State, Date, Product

5. Tools & Technologies Used

- Tableau Desktop / Tableau Public
- Microsoft Excel / CSV (for dataset)
- Data Visualization and Dashboarding

6. Tableau Worksheets / Charts

Visualization	Purpose
KPI Cards	Total Sales, Total Profit and Total Quantity
Line Chart	Sales trend over time
Bar Chart	Sales by Category
Map / Bar Chart	Sales by Region or State
Top Products Chart	Top 10 products by sales
Interactive Filters	Year, Category, Animal Type, Region and other relevant fields

7. Calculated Fields

The following calculated fields can be used in the Tableau dashboard:

Total Sales = $\text{SUM}([\text{Sales}])$

Total Profit = $\text{SUM}([\text{Profit}])$

Profit Ratio = $\text{SUM}([\text{Profit}]) / \text{SUM}([\text{Sales}])$

Average Sales = $\text{AVG}([\text{Sales}])$

8. Dashboard Screenshot

[INSERT TABLEAU DASHBOARD SCREENSHOT HERE]

Paste the final HappyPaws Store Tableau dashboard screenshot in this section.

9. Key Insights

1. The dataset contains 1,000 HappyPaws Store sales transactions with total sales of ■3,878,937.38 and total profit of ■1,561,888.75.
2. Accessories generated the highest total sales among the product categories, with sales of ■1,189,220.42.
3. West generated the highest total sales among the four regions, with sales of ■1,166,752.45.

4. The highest-selling product was Pet Bed, generating total sales of ■678,929.42.

5. The overall profit ratio was 40.27%, while the average sales value per transaction was ■3,878.94.

10. Video Demonstration

Video Link: _____

The demonstration video explains the dataset, Tableau worksheets, dashboard design, filters, calculated fields, and major observations.
